

Technical specifications

Quality:	4900
Composition:	100% wool
Available colors:	Multiple colors
Available thicknesses (+/- 10%):	2-3-5 mm
Density (+/- 10%):	0,28 gr/cm ³
Roll width (+/- 10%):	1800 mm
Long term temperature resistance:	80°C
Short term temperature resistance:	120°C
Acoustics:	Up to 0,82 (appr. 5 mm thickness) Up to 0,56 (appr. 3 mm thickness)
Production origin:	EU
Origin of fibre:	World wide

Wool is naturally repelling soil and moisture. Do not wash, no dry cleaning.

Highly saturated colors. However, deviations are possible.

Self-extinguishing and flame retardant.

Change of temperature, differences in humidity, etc. can be of influence on the woolfelt. Expansion or shrink is possible.

This material is being used for;

- (Interior) design products
- Wall covering
- Fashion

Deviation in color or mélange are possible due to raw materials.

This information has been given with our best knowledge. A liability however, cannot be deduced.

(LASER)CUTTING – STITCHING – PUNCHING – ADHESIVE BACKING – WELDING
