

Technical specifications

Quality: **5022**
Composition: 80% wool
20% viscose
Available colors: green
Available thicknesses: 2-5-10 mm
Density: 0,30 gr/cm³
Roll width : 1800 mm

Long term temperature resistance: 70°C
Short term temperature resistance: 90°C
Tensile strength: +
Acid resistance: +/-
Oxidation resistance: +/-
Recover ability after compression ++
Warmth insulation ability ++
Water absorption and desorption ability ++
Air and steam permeability +
Electrostatic charge -

Excellent:	++
Good - high:	+
Mediocre:	+/-
Bad - low:	-
Very bad:	--

This material is being used for technical purposes

Deviation in color or mélange are possible due to raw materials.

This information has been given with our best knowledge. A liability however, cannot be deduced.
